

John Company Solo Rules Full Player Aid v3

This aid is intended to help you to walk step-by-step through a solo game. This document is a combination of the rules in the Crown Handbook and Rules book. The 2-player rules are not included. In this document, 'You' refers to the solo player, while third-person pronouns (e.g., the Chairman) refer to both you and the Crown. The Crown is also considered a 'player' for game rules. *Crown-related rules are written in italic*. Important rules which are easily forgotten are denoted with: ⚠. Version 3 includes new rules changes proposed by Ricky Royal (<https://boardgamegeek.com/thread/2936700/article/41627121#41627121>).

Setup

1. Setup the Crown board. Use a glass opportunity marker to track the Crown's Climate
2. The Crown uses two sets of family members (36 total).
3. Take 6 red promise cubes for yourself and give the other 6 cubes to the Crown.
4. Setup any scenario as normal (remember that Company Balance always starts at £5). For the setup cards, shuffle the 12 basic cards (no 'extra' cards) and draw the top 3 cards. Choose 1 to keep and give the other 2 to the Crown. Repeat this 3 times. Alternately, deal yourself 4 random setup cards and deal the Crown 8.
5. Shuffle the AI cards and reveal the top card to set the Crown's initial Climate.

Difficulty

- **Easy:** Start with 5 promise cards, which can be traded for promise cubes.
- **Normal:** Do not use promise cards.
- **Hard:** As Normal, but the Crown also starts with 10 promise cubes.
- **Expert:** As Hard, but deal 3 'Extra' cards to Crown.
- **Legendary:** Do not use promise cards, the Crown starts with all 12 promise cubes and 6 'extra' setup cards. If the company fails, select 'Court of Directors Blameless'; the Crown benefits from this, you do not.

Definitions

- **Associated:** Any region controlled by a Presidency.
- **Climate:** Refers to how the Crown views the company and whether or not they will support it. Climate is tracked on the Crown board.
- **Climate Set:** Draw an AI card and refer to the chart to determine the Crown's Climate.
- **Climate Shift:** Roll 6 dice. Based on the number of successes relative to company standing, shift the Crown's Climate to the left and/or right.
- **Favours:** Give promise cubes to the Crown to force certain choices, or take promise cubes from the Crown under certain conditions.
- **Fewest:** The Crown has as much or fewer of something than you, including 0.
- **Home:** Region with Presidency's home port (Bengal/Bombay/Madras).
- **Most:** The Crown has as much or more of something than you, with a minimum of 1.
- **Shortest/Longest Trade Route:** Refers to the maximum number of orders a President could fill with a success, regardless of number of ships.
- **Ties:** If the Crown faces several options and there is no guideline in the rules, you may make the choice.

Basic Favours

Basic Favours can be done any time between the start of the Firms phase and the end of the Revenues phase. These are also described on the Crown board.

+2  (-4 )	Give (or take) an unfitted shipyard.
+3  (-5 )	Give (or take) a fitted shipyard.
+4  (-6 )	Give (or take) an uninvested workshop.
+1  (-3 )	Give (or take) an invested workshop.
+5  (-7 )	Give (or take) a luxury.
+4 	Give an enterprise from a prestige card.
+2 	Give £3.
+X 	[EASY MODE ONLY]. Remove a promise card from the game. $X = \text{Turn}/2$, rounded up

You are now ready to start the game!

0. Vote to Deregulate

At the start of any turn in which the Company Standing and/or Company Debt are on a lined space, the Prime Minister may initiate a vote to Deregulate. If either marker is on the star space, the Prime Minister must initiate the vote. The Prime Minister may vote against this law.

The Crown never voluntarily initiates a vote to Deregulate, and will always vote last and against it. They will spend up to the amount below (once) if it moves the Votes marker to a failing position.

				
£6	£5	£4	£3	£2

Pass: Lower Company Debt by 1 for every 2 Debt. Reset Company Standing to the 'S' space. The Prime Minister gains a passed law token. You may now create a firm.

Fail: Increase the VP value of Company shares by 1 (up to +/-3 VP). There are no further consequences for failure: The PM's role does not change, and the law is not discarded, it may be initiated again.

1. London Season (Skip on first turn)

1. Attrition

Roll a die for each officeholder, adding +1 per fatigue.
(The Chairman adds an additional +1 to their roll.)

- 1-2: No effect.
- 3-4: Add a fatigue to the card.
- 5-6: Move the officeholder to the Pensioners box and their office card to the Vacant Offices box.

2. Retirements

Before conducting retirements, you may:

Take £1 from the Crown family treasury.

Starting with the (former) Chairman, retire family members in the Pensioners box. For each pensioner: move them to a Prize, pay the indicated cost (some Prestige cards give a retirement discount), and gain any VP reward.

The Crown retires pensioners one at a time. Each time, they choose the most expensive Prize they can afford using half (round up) of their current Treasury. They will only use the £2 space if they have no other retirements this turn.

When the Crown has completed all retirements, you may:

Take £1 from the Crown family treasury.

2.5 Special Retirements

Each player with at least 1 firm share may retire 1 family member from their supply. The maximum amount which can be spent on this retirement equals the firm's last dividend payout (do not count the value of retirement discounts).

If the Crown has a firm share, they will take the single highest VP special retirement they can afford.

3. Prestige Cards

Each player who retired 1 or more pensioners this turn may take or discard 1 Prestige card from the London Season display. Start with the player who spent the most on retirements this turn (break ties by total number of Windows, then whoever is Prime Minister). On your turn, you may look at face-down Blackmail cards.

The Crown chooses the Prestige card in the spot shown by the AI card. If unavailable, choose the next card going clockwise.

- The Crown ignores text on Spouse cards, but does receive discounts/VP.
- Keep Crown Blackmail cards face-down.
- Enterprises are effective for the Crown.
- The Crown will not perform an optional card action.
- The Crown never gives consent if a card requires it.

Take an enterprise prestige card from the Crown.

Take a blackmail card from the Crown.
Note: You may not peek at blackmail cards held by the Crown.

Discard remaining Prestige cards and draw 3 new ones (Blackmail face-down). Non-retired pensioners to supply.

2. Family

0. Free Crown Writers ⚠

If there are 4 or more vacant offices, the Crown will first enlist a Writer for free. Then, if there is a Presidential vacancy with no Crown Writer, the Crown will enlist a 2nd Writer for free.

1. Family Action

All players choose a Family Action, starting with the (former) Chairman. If you choose the same action as the previous turn, you can do the action twice. The most recently passed law may allow an additional action for you and the Crown.

Enlist Writer: Place a family member in any Writers box. If there are 4+ vacant offices, you can place an additional Writer once this turn.

Enlist Officer: Place a family member in the Officers-in-Training box.

Buy Luxury: Pay £4 to buy a Luxury card. Gain 2 VP.

Buy Shipyard: Pay £2 to buy a Shipyard card. Place the matching Ship token on it.

Buy Workshop: Pay £5 to buy a Workshop card. Place it on the non-invested side.

Seek Share: Place a family member on any open spot on the Stock track and pay the cost.

The Crown will always do 2 actions, choosing the first viable actions on the list below, from left to right. If a law provides a free action, the Crown will perform it as well (either when encountered on the list, or after completing 2 other actions).

Seeking Shares: The Crown takes the cheapest share (rightmost £3 space if available and cheapest).

Enlisting Writers: Place Writers in priority:

- Vacant Presidency with no Crown Writer.
- Crown Presidency with fewest Crown Writers.
- Presidency with fewer Crown Writers.
- Presidency priority on AI card.

Out of Family Members? You must take a family member from a prize (and lose their VP reward).

2. New Company Shares

If the Company has Debt, move the right-most family member on the Stock track to the Court box and lower Debt by 1. Repeat this until there is no more Debt. If family members remain on the Stock track, slide them to the right-most empty space on the Track, preserving their order.

After new Company shares are resolved, you may:

+1  Give £1 from your family treasury to the Crown if the Crown has a majority of Company shares.

Take a Company Share from the Crown.

-6  **-4**  **-3** 

Give a Company Share to the Crown.

+2  **-3**  **-4** 

Take a Firm Share from the Crown.

-3  **-4**  **-6** 

Give a Firm Share to the Crown (never to give majority).

-4  **-3**  **+2** 

3. Firms

1. Creating a Firm

If the Deregulation law has passed and you do not own a firm, you can form a firm by returning a Company share to your supply or flipping a Workshop to its invested side.

- You cannot use Company shares if the Company Standing and/or Debt is on a lined space, or if the Company share was created this turn (it is 'weak').

*The Crown **never** creates private firms, and you must spend promise cubes to start a private firm.*

-3  If you form a private firm, you **must** perform this favor (using as many  as you have if you have less than 3 .

When you form a firm, flip your family board, place a family member in the Shares box, place a cube on the leftmost space

of the Value track and add £5 to the firm's London treasury from the bank. You are the firm's manager.

2. Firm Investments

Any player may invest in a firm. To do so, either return a Company share to their supply or flip a Workshop to invested.

- A player cannot invest Company shares if the Company Standing and/or Debt is on a lined space, or if the Company share was created this turn.

When a player invests, they add a family member to the firm's Shares box and add £5 to its London treasury from the bank.

- A firm can only have 10 shares. Any further investments provide the £5, but no shares.

After player investments, the Crown might invest in your firm if they have the majority of Company shares. The Crown will invest a Company share (if able) or a Workshop (otherwise). The Crown will never invest in a firm if they would acquire the majority of that firm's shares.

 	  
Will not invest.	Will seek one investment in a firm.
Will invest in your firm for one investment.	[SOLO ONLY] Deny the Crown's investment. $X = \text{value of firm.}$
-2 	-X 

3. Acquiring Ships

You can spend money from the London treasury to fit player ships (£3 each to bank) and/or buy player ships from the Company (£3 if unfatigued, £2 if fatigued, money to the Shipping Office's treasury). In any case, you need the ship owner's consent to acquire their ship. Place acquired ships on your firm board.

-2  Consent to fit a Crown ship.

-2  Consent to buyback a Crown-owned ship from the Company.

4. Hostile Takeovers & Mergers

These actions will never occur in a solo game.

5. Firm Strategy

Select a Firm Strategy card to set which Presidency your firm will trade in, and transfer as much money as you want from the London treasury to the Trade Bid box. If you do not wish to trade (or have no ships), select the 'Hobnob' card and do not transfer any money.

6. Firm Dissolution

You may dissolve the firm following the steps in the Firm Revenue phase. *The Crown always grants consent for firm dissolution.*

4. Hiring

1. Chairman Election

If the Chairman office is vacant, the player with a majority of Company shares chooses the new Chairman by promoting a Company share to the Chairman office. If both players have an equal number of shares, the former Chairman chooses their successor. If there are no shares, the former Chairman hires a family member from their supply. Note: The Chairman still counts as a Company share!

The Crown will always try to elect themselves as Chairman.

-3 

If the Crown has a majority (or is former Chairman), a player may bribe the Crown to elect them as Chairman. **Under Deregulation this becomes -12** .

+3 

If the player has a majority (or is former Chairman) and votes to elect the Crown as Chairman. **Under Deregulation this becomes +6** .

2. Remaining Vacancies

Vacant offices are filled in order, from lowest to highest numbered. Available candidates and the hirer are detailed on the back of the office's card and the chart below. If there is no candidate or hirer, the office stays vacant.

- **Nepotism:** A player may only hire their own family member to an office if they get consent from the other player, or the other player has no viable candidates.
- **Promotions:** When a family member is promoted, their old position is immediately added to the Vacant Offices box. Transfer any fatigue to their new office.

When You Are Hiring

-2 

Consent for Nepotism.

+1 

Hire a Crown family member over any non-Crown family member.

When the Crown is Hiring

The Crown always hires their own family members if able.

+2 

[SOLO ONLY] You must give consent for nepotism to the Crown when required if they have 2 or more promises. Otherwise, consent is optional.

-3 

Make a hiring decision for the Crown.

- **Director of Trade/Governor General Selection:** The Crown chooses the first eligible candidate, going clockwise or counter-clockwise from the Chairman according to the AI card.
- **Candidate Priority:** The Crown will choose a Writer > Officer > Governor. Break ties with AI card.

5. Company Operations

Each office, from left to right, performs their operations (skip vacant offices). It is not allowed to perform an action that would have no effect or no chance of success.

Success Checks

When making a success check, roll the given number of dice and consult the **lowest** value rolled.

- **1-2:** The check succeeds.
- **3-4:** The check fails, but may be attempted again (provided you have sufficient resources).
- **5-6:** The check fails. The office holder is immediately returned to their owner's supply and their office is returned to the Vacant Offices box.

6. Chairman

The Chairman may advance the Company's Debt up to 3 times, adding £5 to the Company's Balance per advance. The Chairman may seek additional Debt, but this requires the consent of the player(s) controlling a majority of shares for each additional advance. Then, the Chairman allocates all funds from the Company Balance to the different office treasuries.

If You Are Chairman

-1

You must **always** perform this favor if able, just once per turn, and prior to any action being taken.

1. Seek Debt

Consent from Crown shares for the first additional advancement above 3 Debt Marker advances.				
-1	-2	-3	-4	-6
Consent from a Crown share for any additional Debt Marker advances.				
-1				

2. Allocate Company Balance

				
Allocate £3 to a Crown office.	Allocate £4 to a Crown office.			Allocate £5 to a Crown office.
+1 				

3. Set Climate

When you have finished acting, flip a new AI card to set the new Crown climate.

If the Crown is Chairman

1. Set Climate

Before the Crown acts, flip a new AI card to set the new Crown climate.

2. Seek Debt

The Crown will advance the Debt marker for each...

...Presidency with an open home port.		...sea zone with less than 2 ships.	...Presidency where the Crown is Commander or has majority of total Army box pieces.	Do not advance Debt marker.
Request an additional Company Debt advancement.				
-1		-2	-3	
Request one less Company Debt advancement.				
-2		-1		—

3. Allocate Company Balance

The Crown will allocate funds in the priority order. Give as much money as possible to each step. The Crown allocates any left over money to the Manager of Shipping.

-1 

At any point before each step, request that £3 (or less) be allocated to a specific office.

				
£4 to each Presidency with an open home port. £5 to Director of Trade / Governor General.	£4 to each Crown Presidency with an open home port. £1 to each Presidency with a Crown writer. £3 to Director of Trade / Governor General.	£5 to Shipping for each Presidency with a sea zone with less than 2 ships. £4 to the Crown Presidency with most ships. £3 to Director of Trade / Governor General. £1 to each Presidency with a Crown writer.	£4 to each Presidency where Crown has a majority of pieces in the Army box. £2 to each Presidency with a Crown Governor. £4 to Crown Governor General. £2 to each Presidency with a Crown writer.	£5 to each Presidency where Crown is Commander or has majority of officers. £2 to each Presidency with a Crown Governor. £5 to Crown Governor General.

7. Director of Trade

1. Special Envoy

The Director of Trade can perform the **Special Envoy** action any number of times. For each attempt, spend any amount of money from their treasury and roll one die per £1 spent. If successful, choose one outcome:

- **Open a Closed Order** in any region in India not controlled by the Company.
- **Open Trade with China:** Add Superintendent of Trade in China office to play and immediately hire a Writer there (following normal Nepotism rules).

If You Are Director of Trade

				
Open an order in the home region of a Crown Presidency that has at least one Crown writer.				
+1 			—	

If the Crown is Director of Trade

The Crown will conduct **Special Envoys** using exactly £X per attempt, depending on their Climate, targeting the northern-most closed order of a non-company controlled region chosen based on the AI card priority. Repeat until less than £X is available, whereupon the Crown will pass.

				
£3	£3	£3	£4	£5

				
Force the Crown to spend more or less money (any amount, including zero, and optionally skip additional Special Envoy actions).				
-2 			-1 	

-1 

Target a specific order.

-3 

Open trade with China.

2. Transfers

The Director of Trade may make up to 2 transfers. Each transfer moves 1 Writer or Ship from one Presidency/sea zone to another.

If You Are Director of Trade

				
After the office has acted, no Presidency has 2 or more ships or writers than any other Presidency.				
+1 			—	

If the Crown is Director of Trade

The Crown will attempt up to 2 transfers using the following priority list (skip any that cannot be performed and stop when the bottom of the list is reached). Use the AI card to break ties for origins/destinations. The Crown will transfer a Company ship > non-fatigued ship > Crown ship > your ship.

				
1. A Crown writer from Presidency with shortest trade route to Presidency with longest. 2. A ship from Presidency with shortest trade route to Presidency with longest. 3. A player writer from Presidency with longest trade route to Presidency with shortest.	1. A ship from Presidency with shortest trade route to Presidency with longest. 2. A Crown writer from Presidency with fewest ships to Presidency with most ships. 3. A player writer from Presidency with longest trade route to Presidency with shortest.	1. A ship from Presidency with fewest Crown writers to Presidency with most Crown writers. 2. A Crown writer from Presidency with fewest ships to Presidency with most. 3. A ship from Presidency with fewest Crown writers to China. 4. A ship from Presidency with most player writers to Presidency with the fewest player writers.	1. A ship from player Presidency to Crown Presidency. 2. A Crown writer from Presidency with fewest ships to Presidency with most. 3. A Crown writer from player Presidency to Crown Presidency.	1. A Crown writer from player Presidency to Crown Presidency. 2. A ship from Presidency with fewest Crown writers to Presidency with most Crown writers. 3. A ship from Presidency with fewest Crown writers to Presidency with most Crown writers. 4. A player writer from player Presidency to Crown Presidency.

-1 

Prevent a transfer (counts as one of two available to the Crown).

-2 

Transfer 1 writer/ship to a Presidency/sea zone of player's choice (counts as one of two available to the Crown). *Players may not undo a previous transfer.*

8. Governor General

Creation

The Governor General is created by passing a law. When the position is created, immediately retire all regional Governors and remove their office cards and overlays from the game. The Director of Trade becomes the new Governor General: Place the Governor General overlay over the Director of Trade space, remove the Director of Trade office card from the game and transfer any fatigue to the Governor General card.

1. Regional Income

During the Governor General phase, first add £3 to the Company Balance for each Company-controlled region.

2. Govern

The Governor General may attempt to Govern any number of times, but must stop after a success.

1. Make a check: Spend any amount of money from the Governor General treasury and roll one die per £1 spent.
2. For each 6 rolled, add 1 unrest in each Company-controlled region.
3. If successful: The player gains £1 for each Company-controlled region, and must perform one of the following actions in each Company-controlled region:
 - **Shipbuilding**: Place a Company ship in any sea zone (including China).
 - **Commission Regiment**: Place a new Regiment in any Army.
 - **Tax**: Add £2 to the Company Balance or to any treasury except the Governor General's. Then, add 1 unrest in a Company-controlled region (place the unrest in a different region for each Tax action this turn).
4. If unsuccessful: Place 1 unrest in each Company-controlled region.

If You Are Governor General

Add money to a Crown office's treasury.

Place a regiment into an Army associated with a Crown Presidency.

Place a Company ship into a sea zone associated with a Crown Presidency.

If the Crown is Governor General

The Crown will attempt to Govern as long as they can roll the number of dice given by this table:

 5 		 3 		 2 
 Increase or decrease the required number of dice by 1  .				

If successful, the Crown will:

				
Tax (adding funds evenly among Crown Presidencies, then remainder to Company Balance).		Build Company Ship.	Commission Regiment.	
-2  Choose a different result for a successful Govern action.				

9. Manager of Shipping

The Manager of Shipping must spend money from their treasury until they have at most £2 remaining. Money can be spent to:

- **Fit Ships on Shipyards:** Pay £3 to the bank to move a ship in a Shipyard to any sea zone (owner's consent is not required).
- **Buy Company Ships:** If there are no ships on Shipyards, pay £5 to the bank to place a Company ship in any sea zone.
- **Lease Extra Ships:** Pay £2 to the bank to place an Extra ship in any sea zone.

If You Are Manager of Shipping

Fit a Crown ship.

Place a ship in a Crown Presidency or Crown Superintendent of China.

If the Crown is Manager of Shipping

1. Fitting Ships

The Crown will fit as many of their own ships as possible, then your ships.

Fit a specific ship.

If the Crown fits one of your ships; you must **always** perform this favor if able, and prior to picking the sea zone.

2. Buying Company Ships

Will not buy Company ships.	Will buy 1 Company ship, if able.	Will buy as many Company ships as able.	Will buy 1 Company ship, if able.	Will not buy Company ships.
Buys a Company ship.	Does not buy a Company ship.	Buys as many Company ships as you wish.	Does not buy a Company ship.	Buys a Company ship.
The Crown buys another Company ship.				
	—			

3. Leasing Extra Ships

The Crown will spend as much remaining money as possible on Extra ships.

The Crown must leave £2 unspent.

4. Placing Ships

The Crown will place all ships they have fitted, bought and/or leased this turn...

...in the Presidency's sea zone with the longest open trade route, with priority going to a Crown Presidency.	...in the Presidency's sea zone with longest open trade route, with priority going to Presidency with more Crown writers.	...in a Crown Presidency's sea zone. If none, Presidency with the highest number of writers.	...in the Presidency's sea zone with the highest number of Crown writers.	...in China, if possible; otherwise, in the Presidency's sea zone with highest number of Crown writers.

In this chart, the **highest** number may be zero.

The Crown places the ship into a sea zone (or China) of your choice.

10. Military Affairs

1. Transfers

Each turn, Military Affairs makes up to 2 transfers. For each transfer, move 1 Officer or regiment from one Army to another.

If the Crown is Military Affairs

The Crown will attempt 2 transfers according to the priorities below. The Crown will transfer Regiments > Crown Officers > your Officers. Skip any transfer that cannot be completed, or which undoes a previous transfer. Use the AI card's arrows to break ties.

Player Presidency's Army to a Crown Presidency's Army.		Army of Presidency with fewest ships to Army of Presidency with most ships.		Army where a player is Commander to an Army where the Crown is Commander.

-1

Transfer 1 officer or regiment from a Presidency to another Presidency (counts as one of the Crown's two transfers).

-1

Prevent any transfer from happening this round (counts as one of the Crown's two transfers).

2. Assign Officers-in-Training

Assign each Officer-in-Training to any Army.

If the Crown is Military Affairs

The Crown will assign your Officers > Crown Officers. For each assignment, start from the top of the priority list below and break ties by the following priorities (if still tied, use the AI card's black arrow, then white arrow).

1. A Crown Presidency, then 2. The Presidency with the most ships, then 3. A Presidency where Crown is Governor, then 4. A Presidency that creates a new Crown majority of pieces, then 5. A Presidency that creates a Crown equality with a player holding a majority of pieces, then 6. A Presidency where Crown has a majority of pieces and does not lose a Crown majority, then 7. A Presidency where the Crown is Commander.			1. A Presidency that creates a new Crown majority, then 2. A Presidency that creates a Crown equality with a player holding a majority of pieces, then 3. A Presidency where Crown has a majority of pieces and does not lose a Crown majority, then 4. A Presidency where Crown is Governor, then 5. A Presidency where Crown is Commander, then 6. A Crown Presidency, then 7. The Presidency with the most ships.	

-1

Assign 1 officer to a Presidency of your choice.

3. Assign Commanders

In each Army where a player has more total pieces than the Commander player, or where there is no Commander, assign a new Commander from among the players with the most total pieces in that Army. A replaced Commander is demoted to an Officer.

If You Are Military Affairs

+1

Assign the Crown as Commander of an Army when able. This **always** applies, even if you have no choice but to assign the Crown as Commander.

If the Crown is Military Affairs

The Crown will assign their own Officer as Commander if they are eligible.

11. Presidencies

Each President decides the order of their Commander, Governor and Trade actions (each action must be completed before proceeding to the next one). If the Presidency is vacant, the Chairman chooses, but they cannot initiate Trade or approve alliances.

If the Crown is President

Crown Presidents choose the action order: Governor > Commander > Trade.

Make a single change in the order of Presidency operations.

Firm Initiative

If your firm is trading in the acting Presidency's region, before resolving any Presidential actions, check the firm's Initiative value: Roll 1 die for each £ in the Trade Bid box (return the money to the bank). If at least 1 success is rolled, the firm may trade this turn. The firm's Initiative equals their total number of ships minus their number of successful die rolls.

12. Governors

Administer

Governors attempt the Administer action, starting with the number of dice listed on their office card. They may make multiple Administer attempts, rolling one less die each time, until they run out of dice, choose to stop, or suffer a catastrophic failure.

If successful, the Governor player gets £1 (£2 if the previous roll was unsuccessful) and chooses one of the following options:

- **Build Company Ship:** If there is a Company ship in the Governor's region, move it to their Presidency's sea zone. Otherwise, place a Company ship in the Governor's region (it is under construction).
- **Commission Regiment:** Add a regiment to their Presidency's Army.
- **Tax:** Add £2 to the Company Balance or their Presidency's treasury. Add 1 unrest to the region for each Tax after the first.

If unsuccessful: Add 1 unrest to the Governor's region.

If You Are Governor

Add money from a Tax Administer action to a Crown Presidency.
This can only be taken once per turn per Presidency.

Move a Company ship into the sea zone associated with a Crown Presidency.

Commission Regiment into an Army associated with a Crown Presidency.
This can only be taken once per turn per Presidency.

If the Crown is Governor

The Crown will repeat the Administer action so long as they can roll at least as many dice as listed below:

3		2		1

Increase or decrease the required number of die by 1

Take no Administer actions.

If the Administer action was successful, the Crown will:

Tax (adding funds to Crown Presidency first, then remainder to Company Balance).		Build Company Ship.	Commission Regiment.	

Choose a different result for a successful Administer action.

13. Commanders

1. Local Alliances

A Commander can request money from their President to purchase local alliances. Move purchased alliances to the available forces.

If You Are the Commander

Consent to purchase a Local Alliance from a Crown President.				
-2		-1	0	

If the Crown is the Commander

Crown Presidents always give consent to Crown Commanders to purchase local alliances.

Will not purchase a Local Alliance.		If the Crown's Army strength is 3+ they will attempt to purchase the cheapest affordable Local Alliance (requires presidential consent).		If the Crown's Army strength is 2+ they will attempt to purchase the most expensive affordable Local Alliance (requires presidential consent).
Will purchase an additional Local Alliance of your choice, and you must give consent to the Crown if they purchase Local Alliances in your Presidency.				
-2		-1		
—		The Crown must purchase a more expensive Local Alliance.		The Crown must purchase a less expensive Local Alliance.
—		-1		-1
—		If the Crown has the Presidency, the Crown will not purchase a Local Alliance.		
—		-1		-2
+1 Give consent to the Crown purchasing Local Alliances in your Presidency if you did not pay promises to make them purchase Local Alliances.				

2. Deploy

The Commander may deploy as many times as they wish and can afford, as long as there is a chance of success.

1. **Select a target:** either a region controlled by the Commander's Presidency (as long as there is at least one closed order and/or unrest) or any adjacent region not controlled by another Presidency.
2. **Make a check:** Exhaust any number of Regiments, Officers and local alliances. Each exhausted unit lets you roll 1 die (or dice equal to their strength for an alliance). Roll 1 less die for each tower level in the target region (plus associated regions if it is part of an empire).
3. **Death check:** Roll a die for each committed Officer. On a roll of 6 they are returned to their supply (they get no Loot).
4. **If successful:**
 - a) Gain Loot: £4 per Tower Level + £ for any Loot token (minimum £ = surviving Officers + 1). Divide the loot evenly between all surviving participants: Commander > Officers (own first) > Regiments > Alliances.
 - b) Player gains 1 trophy per Tower Level in target region.
 - c) Open all orders and remove any unrest in the target region.
 - d) If the region was not Company-controlled: Remove Tower + Dome, move the loot token to the Presidency's box, add the region's Governor overlay, and place the region's Governor card in the Vacant Offices box.
 - e) If the Elephant was facing out of the target region, place it in the centre of the region.
5. **If a catastrophic failure:** The Commander's player loses half (round up) of their trophies and returns their Commander to their supply.

If You Are the Commander

				
Successfully complete a Deploy action in a non-Company region using one or more Crown officers.				
—		+1 		
Successfully complete a Deploy action in a Company-controlled region associated with a Crown Presidency that has at least one Crown writer.				
+1 		—		

If the Crown is the Commander

The Crown will attempt a Deploy action in a...

...Presidency's home region with closed orders, then Company-controlled regions associated with this Presidency with closed orders, then Presidency's home region if not Company-controlled, then any non-Company-controlled regions adjacent to Company-controlled Regions.		...Presidency's home region if not Company-controlled, then any regions not Company-controlled and adjacent to Company-controlled Regions associated with this Presidency, then Company-controlled regions associated with this Presidency with closed orders.		

-2

Choose a valid region in which the Crown will attempt to Deploy.

The Crown will only Deploy if they can roll the exact number of dice listed below (target lower priority regions if necessary, and in priority order, in order to reach this requirement). They will exhaust Alliances > Crown Officers > Your Officers > Regiments.

Non-Company Controlled Region	6	5	4	3	2
Company Controlled Region	2	3	4	5	6

-1

Increase or decrease the required number of dice by 1 .

-X

Once pieces have been exhausted and before rolling dice, exchange X value pieces that were exhausted for pieces that were not. *Note: Local Alliance of strength X counts as X pieces.*

The Crown might attempt to deploy again:

The Crown will not attempt to take the Deploy action again.			The Crown will attempt to take the Deploy action again.	
The Crown takes the Deploy action again.			The Crown will not take the Deploy action again.	
-2		-1		-1

14. Trade

Presidents attempt to fill open orders, starting from their home port and continuing through connected open orders. Each President may only perform one successful Trade per turn. It is not allowed to fill an order in another Presidency's home region.

1. The President declares which regions they will trade in, starting from their home region and including regions connected via open orders. The total number of orders crossed cannot exceed the number of ships in their sea zone.
2. Make a check: Spend any amount of money from the President's treasury and roll one die per £1 spent. Roll one die less for each region traded in beyond the President's home region.
3. If successful: For each ship in the President's sea zone, place a Writer (or 'Filled Order' token if none remaining) on an open, empty order in a declared region. Filled orders must start from the Presidency's home port, and must be placed adjacent to other filled orders after that.
 - a. For each filled order, add the amount listed to the Company Balance.
 - b. The President player gets £1 for each filled order.
 - c. Each player gets £1 for each of their Writers placed on an order.

If You Are President

Place X Crown writers when filling orders. This **always** applies, even if you have no choice but to place Crown writers.

If the Crown is President

The Crown will spend the money necessary to roll the number of dice listed below. They will first attempt the highest value trade route, but will trade in fewer regions if they cannot reach the required number of dice listed below. Then, if there are treasury funds remaining, the Crown will spend up to £3 additional on the Trade action.

Increase or decrease the required number of dice by 1 .

When filling orders, the Crown prefers the highest-value trade route. If tied in value, the Crown prefers:

1. Home region orders
2. Orders closest to home region
3. Most southerly equidistant orders

The Crown places their own Writers before placing your Writers.

The Crown places your writer instead of another.

If the Firm is Trading

Compare the firm's Initiative with the Company's Initiative (number of ships in sea zone **minus** number of trade successes rolled). Conduct trade from lowest to highest Initiative (President breaks ties – *the Crown will choose the Company first*). If the Company is not trading, conduct firm trading after any Commander and/or Governor actions.

- Firms fill orders in the same way as the Company, but they do not roll less dice for crossing borders, they do not use Writers (use 'Filled Order' tokens instead), they fill a number of orders equal to the number of their ships plus one, and the may fill orders in another Presidency's home region.
- The firm and the Company may fill orders previously filled by the other, but they only receive half the value of the order (round down).

Add money generated from filled orders to the firm's India treasury. Increase the firm's Value marker 1 space for each £6 added to the Firm's India treasury this turn.

15. Superintendent of Trade in China

The Superintendent's treasury contains only ships, which can be sent there by the Manager of Shipping or Director of Trade.

Trade in China

Up to once per turn, and only if the Company controls a region with opium icons, roll a die for each ship in the Superintendent's treasury. If successful, for each opium icon in Company-controlled regions: Player gets £1 and Company Balance increases by £4.

If the Crown is Superintendent

The Crown will roll as many dice as possible, so long as they will roll the minimum number of dice listed below.

16. Bonuses

Players gain £1 for each Shipyard with a fitted ship and each non-invested Workshop they own. Additional bonuses may apply.

17. Firm Revenue

1. Firm Expenses and Dissolution

The firm must spend money from the London and/or India treasury to pay expenses:

- £1 for each ship owned by the firm.
- The higher of: £1 for each firm share or £ equal to the firm's value.

If a firm cannot pay its expenses, it can seek emergency investments or be dissolved.

- **Emergency Investments:** A player may invest Company Shares (not if it was created this turn, nor if Company Standing and/or Debt is on a lined space) and/or non-invested Workshops (flip them to invested). For each emergency investment, add £5 to the firm's London treasury, and the investing player places a family member in the firm's Shares box (unless there are already 10 shares present). After all expenses are paid, remove any leftover money in the firm's treasury and reduce the firm's value by 1 space for each emergency investment received this turn.

The Crown will not invest in a firm seeking emergency investment.

The Crown invests in your firm with Company shares (unless they are weak), and then workshops, regardless of majority of Company shares. *Note: players cannot use this bribe if doing so results in the Crown having more firm shares than manager.*

- **Dissolution:** Move each share piece to the Debtor's Prison. Return all firm ships to their Shipyards. Flip the firm board to its family side. Any Workshops invested in the firm remain invested.

2. Firm Dividends

You may choose to pay dividends from the firm's India treasury. To pay a dividend, you must pay each player £1 per firm share they own, and pay yourself (the firm manager) an additional £1. You may choose to not pay any number of your own shares.

If you pay the Crown firm share dividends equal to or more than any (all) other player(s) in the firm (i.e. do not include cash paid for the firm manager dividend). *X = the number of Crown firm shares (max 3).*

Record the total amount of money paid out in dividends by placing the firm's dividend cube on the Company Balance track. If the firm did not pay out dividends and chose the 'Hobnobbing' strategy, keep the dividend cube in its current space. Otherwise, set the dividend cube to zero.

Move any money remaining in the firm's India treasury to their London treasury.

18. Company Revenue

1. Expenses

Reduce Company Balance by £1 for each Company Debt, Regiment, Officer (not Commanders!) and Ship in a sea zone.

- **Emergency Loans:** If the Company cannot pay expenses, emergency loans must be taken: Advance the Debt marker (if able) and add £5 to the Company Balance, repeating as needed. Once all expenses are paid, set Company Balance to zero and reduce Company Standing by 1 space (if 1-2 loans were taken) or 2 spaces (if 3+ loans were taken).
- *If there are emergency loans, the Crown will always discard Royal Protection if they are Chairman and it is available.*

2. Check Expectations ⚠

Lower Company Standing by 1 space if Company Balance is less than the Expectations value listed beneath the Company Standing.

3. Pay Dividends

The Chairman may pay out Dividends: Lower Company Balance equal to the number of shares, and each player gains £1 per share they own. Multiple dividends may be paid.

If the Crown is Chairman

The Crown will always pay 1 dividend if able, and will pay more if they can keep a minimum Company Balance of:

4. Company Standing ⚠

If the total amount of money paid out in dividends exceeded Expectations, advance Company Standing by 1 space.

19. Events in India

Roll the Storm die.

1. Storms

Roll a die for each player-owned ship (including firms) in the rolled sea zone(s) (ships in the China treasury are in the East):

- **1-2:** No effect.
- **3-4:** Flip the ship to fatigued. If already fatigued, return the ship (face-up) to its Shipyard.
- **5-6:** Return the ship (face-up) to its Shipyard.

2. Events

Draw and resolve Event cards, one at a time, until the number rolled on the Storm die is reached.

- **Writer Loss:** When an order with a Writer on it is closed, return that Writer to their supply.
- **Cascade:** If required to close an order in a region where all orders are already closed, Cascade occurs. Close all open orders connected to that region. If a connected order is already closed, close the northern-most open order in that region. If all orders in that region are already closed, trigger an additional Cascade. Each region may only Cascade once per event.

Crisis	Use Elephant position to determine the Crisis type and follow flowchart on next page.	
Foreign Invasion	Roll Storm die: Resolve an invasion in each of Bombay/Madras/Bengal adjacent to rolled sea zone(s) (top of deck region if '4' rolled). For each, follow Invasion steps, but roll a die for attack strength. If invasion succeeds: Close all orders and set tower level = ½ invasion strength (round down); If Elephant is inside a conquered Company-controlled region, point it out across the ● shape (otherwise, leave it in place).	
Leader	Check region on top of deck: <u>Sovereign?</u> Add 1 Tower. <u>Dominated?</u> Resolve rebellion (see flowchart).	
Peace	If Elephant connects 2 regions, remove connected closed orders and add 1 tower in each. If Elephant is <u>inside</u> a region, open all closed orders and remove any unrest there.	Then move Elephant to region on top of deck.*
Shuffle	Move Elephant to region on top of deck.* Shuffle this card into deck. Shuffle discards and place on top of deck.	
Turmoil	Close northern-most order in region on top of deck. If all closed, perform <u>Cascade</u> .	
Windfall	Players gain £1 per Writer in/adjacent to region on top of deck.	

*When moving the Elephant, place it inside the region if Company-controlled, else on border shape (facing capital if dominated).

Crisis/Rebellion/Invasion Resolution *(If a Crown Commander is defending, you choose which pieces to exhaust.)*

*if commander is vacant, Military Affairs acts. If MA also vacant, Chairman acts. Neither MA nor Chairman will lose/gain trophies.

20. Parliament Meets

If You Are Prime Minister

1. You reveal up to 3 Law cards and chooses one (if a Dilemma! is drawn, it must immediately be chosen).
2. You then rotate the PM wheel in either direction, stopping at the first policy which matches the chosen law card.
3. Set the initial number of Votes indicated on the law card.
4. Roll 6 dice on the Climate Shift table below to adjust the Crown's Climate. 
5. The Crown will vote for or against a law depending on their voting plan (last page). The Crown receives votes from their enterprises and additional free votes based on the size of their personal treasury (see below). If voting against the law, the Crown becomes the Opposition Leader.
6. You cannot vote against a law (you may abstain). You receive votes from your enterprises, and you can gain an additional vote for each £1 you spend from your personal treasury.
7. If the law has 0 or more net votes, it passes. You gain a Law Passed marker, implement the law's instructions (the effects may be ongoing), and implement the law's policy (see below).
8. If the law has -1 or fewer votes, it fails. Discard the law, resolving any "If Failed" effects. *The Crown becomes Prime Minister and shifts the policy wheel one space left or right and implements that policy (see Policy Selection below).*

If the Crown is Prime Minister

1. Roll 6 dice on the Climate Shift table below to adjust the Crown's Climate. 
2. The Crown draws Law cards up to the number shown on the AI card, and chooses the last card drawn (if a Dilemma! is drawn, it must immediately be chosen).

The Crown stops drawing and selects the law just drawn.

The Crown skips the law drawn and draws again (must select 3rd law drawn).

3. The Crown will rotate the PM wheel in either direction, stopping at the first policy which matches the chosen Law card. The card will choose which direction to rotate based on the Policy Selection rules below.
4. Set the initial number of Votes indicated on the law card.
5. The Crown will vote for or against a law depending on their voting plan (last page). The Crown may vote against a law while Prime Minister. The Crown receives votes from their enterprises and additional free votes based on the size of their personal treasury (see below).
6. You may vote for or against the law (or abstain). You receive votes from your enterprises, and you can gain an additional vote for each £1 you spend from your personal treasury.
7. The player with the most votes against the law becomes Opposition Leader (no change if tied).
8. If the law has 0 or more net votes, it passes. The Crown gains a Law Passed marker, implement the law's instructions (the effects may be ongoing), and implement the law's policy (see below).
9. If the law has -1 or fewer votes, it fails. Discard the law, resolving any "If Failed" effects. *The player who cast the most votes against the law becomes Prime Minister (this may be the Crown!). If tied, the Opposition Leader becomes Prime Minister. The new PM shifts the policy wheel one space left or right and implements that policy (see Crown Policy Selection below).*

Extra Crown Votes (Based on the amount of money in the Crown's treasury)

£0 - £3	£4 - £6	£7 - £10	£11 - £14	£15+
+0 votes	+1 votes	+2 votes	+3 votes	+4 votes

Climate Shift Table (Roll 6 dice and compare the number of successes with the current Company Standing – perform as many of the listed rightward shifts as possible, followed by as many leftward shifts as possible)

Successes	Company Standing						
	£4	£6	£8	£10	£12	£14	£16
0						◀	◀◀
1	➤				◀	◀◀	◀◀
2	➤➤	➤		◀	◀◀	◀◀	◀◀
3	➤➤	➤➤	➤ ◀	◀◀	◀◀	◀◀	◀◀
4	➤➤	➤➤ ◀	➤➤ ◀◀	➤ ◀◀	◀◀	◀◀	◀◀
5	➤➤ ◀	➤➤ ◀◀	➤➤ ◀◀	➤➤ ◀◀	➤ ◀◀	◀◀	◀◀
6	➤➤ ◀◀	➤➤ ◀◀	➤➤ ◀◀	➤➤ ◀◀	➤➤ ◀◀	➤ ◀◀	◀◀

Crown Policy Selection

The Crown chooses a policy where they have the greatest advantage / least disadvantage in enterprises compared with you (for Tax, where they will pay relatively less than you). Break ties with the AI card (counter)clockwise arrows.

The Crown moves the policy marker to the alternative policy.

Policies

Each player must pay £1 for each of the listed enterprise they own, or they lose that enterprise. If a Shipyard with a fitted ship is lost, the ship remains in play, but the Shipyard cannot be reclaimed.*

If a Window Tax is indicated, each player must also pay £1 for each Window on their family members' prizes and enterprises. If the tax cannot be paid, the asset is lost (return the family member to supply). *

Each player gains £1 for each of the listed enterprise they own.

Swap the positions of the indicated Power marker and the next higher marker on the Power track. If already in the highest position, swap the positions of any other 2 Power markers (*The Crown will swap the 2 lowest Power markers in this case*).

*The Crown will use 'Royal Privilege' as needed to pay taxes (see below).

Royal Privilege

If the Crown cannot afford to pay a tax, they will use funds from the Company Balance. The Crown will force the Company to take **emergency loans** as required. In this case, if the Crown is Chairman, they will always discard 'Royal Protection' if it is available.

21. Upkeep and Refresh

1. Upkeep

Each player must pay the upkeep cost for each family member's prize or lose that prize (and its VP). *The Crown will use Royal Privilege as needed to pay their upkeep (see above).*

2. Refresh

1. Return all Writers to their associated Presidency.

[SOLO] You have one or more writers in a Crown Presidency, but you do not have at least one writer return from filling an order in that Presidency.

2. Return any Filled Order tokens to supply.
3. Return Extra Ships to supply.
4. Return exhausted Officers/Regiments to active. Active local alliances become exhausted.
5. Advance the turn marker and begin the next turn.

22. Game End & Scoring

The game ends at the end of the last turn of the scenario, or immediately if the Company fails. Proceed to final scoring:

1. **Base Victory Points:** Players score VPs for retirement prizes, luxuries and spouses.
2. **Power Award:** *The player with the most Power scores the higher VP according to the final game turn. Power comes from:*
 - Each Share/Workshop/Luxury/Shipyard is worth 0-2 Power according to the Power track.
 - +1 Power for each passed law and trophy.
 - Blackmail cards in your player area may provide Power. (*Check the Crown's Blackmail cards now*).
 - The player who is Prime Minister gains +2 Power.
3. **Court & Workshops:** If the Company survived, each share is worth the VP value noted in the Court. If the Company failed, Shares are worth negative VP and players score 1 VP for each Workshop they own.
4. **Firms:** For each firm share, gain/lose VP according to the firm's value. Lose 1 VP per family member in Debtor's Prison.
5. **Final Retirement:** If the Company survived, make one final Attrition roll and retire any pensioners (do not gain any Prestige cards). Regardless of Company success, shareholders in a firm may also perform a final special retirement. [*Hard/Expert/Legendary: The Crown will spend as much as possible on final retirements.*]
6. **Consequences of Failure:** If the Company failed, draw a Company failure card and resolve it.
7. **Finally**, if the Company failed, you (not the Crown) adjust your VP according to the table to the right.
8. The player with the most VP (even if negative) is the **winner!** (Break ties with most Windows, then Prime Minister).

Game Turn	1	2	3	4	5	6	7	8
1710	-5	-4	-3	-2	-1	0	0	0
1758			-5	-4	-3	-2	-1	
1813					-4	-3	-2	-1

23. Crown Voting Plan

THE CROWN'S VOTING PLAN		
LAW NAME	FOR	AGAINST
Army Spending	 	  
Board of Control	If the Crown is Prime Minister. They will remove a player from office at the first opportunity.	Otherwise.
Calico Acts	If the Crown has <i>most</i> workshops.	Otherwise.
Company Aids Government	 	  
Debt Restructure	 	  
Envoy to China	  	 
Governor General	If the Crown is Director of Trade.	Otherwise.
Inclosure Acts	If the Crown has <i>most</i> prizes.	Otherwise.
Industry Subsidy	  	 
MASSES DEMAND FRANCHISE!	Otherwise.	If the Crown has <i>most</i> Rotten Boroughs.
Military Oversight	If the Crown is Prime Minister. A Crown Military Affairs will always demote a non-Crown Commander if a Crown Officer is in that Army.	Otherwise.
OLD IDEAS MADE NEW!	If the Crown is Prime Minister, choose the Law randomly.	
PUBLIC DEMANDS IMPEACHMENT!	If the Crown is Prime Minister. They will select first player office from left to right on ribbon. If all Crown offices, then randomly.	Otherwise.
RELIEF DEMANDED FOR INDIAN FAMINE!	Otherwise.	The Crown has <i>most</i> of given policy.
Royal Protection	If the Crown has <i>most</i> luxuries.	Otherwise.
Sepoy Recruitment	  	 
Ship Subsidy	  	 
Tenure Limits	Otherwise.	If the Crown is Chairman.
Trade Regulations	 	  
Treasure Reform	 	  
WAR AGAINST FRANCE!	If the Crown is Prime Minister. They will select player ships/officers, then Company ships, then Crown ships/officers.	Otherwise.
Window Tax Repeal		   
Writer Graft Reform		   
Writer Privileges	If the Crown has <i>most</i> writers currently on Orders.	Otherwise.
Zamindar Taxes	If the Crown has <i>most</i> Governors.	Otherwise.

Reminder: for the Crown, the word *most* includes ties so long as the Crown has at least one.
